

## COVID-19 PROOF REFRACTORY ANCHOR INSTALLATION: SAFE AND RELIABLE

SILICON RAW - Rapid Arc Welding: The recommended solution for the COVID-19 pandemic

### Priorities

Reduced Number of People

Keeping Safe Distance

Reduced Work Time

Maximum Reliability

### For Your Planned and Emergency Turnarounds

When it comes to designing, manufacturing and installing refractory anchors, **we are the experts**. We recognize that it is crucial for our customers to minimize downtime on their plants and projects. That's why we make every effort to ensure our service delivery is geared to achieve that goal, while complying to COVID-19 safe work procedures.

Consider RAW the safest way in these challenging times

### Traditional Hand Welding

Large teams of Certified and experienced welders in one space required

Long Turnaround Downtime  
(More Time = More Exposure)

Lots of Heavy Equipment,  
Unreliable Results

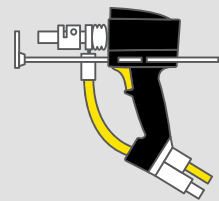

### SILICON Rapid Arc Welding

60 - 70% Less Staff  
Required in One Space

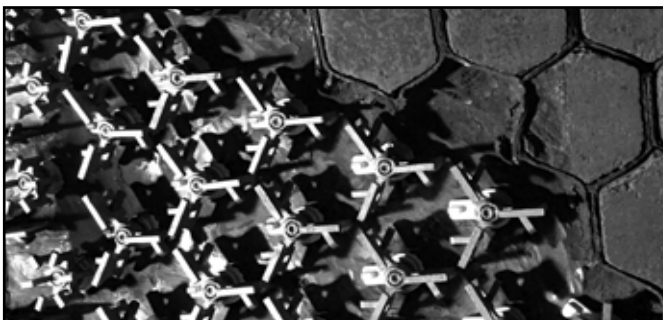

10 Times Faster  
(Less Exposure)

Fast Response  
and Mobilization  
Proven Success

### SILICON Jobsites

**Less People + Less Time = Minimum Risk of Contagion**
